

Gas Station Underground Containment Systems

- Watertight Conductive Composite Covers
- Fuel Tank Manhole Sumps Systems
- Hand Hole Sumps Systems
- Dispenser Sumps Systems
- Pipe and Cable Entry Seal Kits
- Remote Filling Box
- Leakage Test Systems
- Brass Quick Pipe Couplings
- Flexible Hose Connectors

Introduction

Compolite® is an innovative manufacturer who focuses on R&D, manufacturing, sales and marketing for watertight conductive composite covers, fuel tank manhole sumps, hand hole sumps, dispenser sumps and pipe/cable entry seal kits in gas station. We have an excellent team who owns many years' experiences in the field of gas station, watertight containment systems and GRP composite materials. We keep in cooperating with R&D laboratory and world famous manufacturing suppliers of GRP composite materials and improving our products continuously according to those feedbacks from our customers.

We absolutely do not allow the release of gas penetrate into the soils. We also strive to prohibit water and dusts from entering into the sumps in gas station, which greatly protects fuel pumps, valves, and fittings inside and increases their life span.

Due to our high-quality products, professional services, and perfect solutions, our products are sold and promoted around the world including most countries in Europe and America.

All the daily activities we work on are based on the actual requirements which our customers find in their installations, maintenances, and operations on site. All the work we have been doing are to make our customers work easily and safely and to help our customer save costs. Therefore, any feedbacks and suggestions from our customers are welcomed.

Compolite® care for the environment we live in.

Our Main Products:

- Watertight Conductive Composite Covers
- Fuel Tank Manhole Sumps Systems
- Hand Hole Sumps Systems
- Dispenser Sumps Systems
- Pipe and Cable Entry Seal Kits
- Remote Filling Box
- Leakage Test System
- Brass Quick Pipe Couplings
- Flexible Hose Connectors

Customer-specified Solutions for Underground Containment Systems

Not only the professional products but also the professional services are provided by **Compolite**® in the fields of watertight conductive composite cover, fuel tank manhole sumps, hand hole sumps, dispenser sumps and pipe/cable entry seal kits. Our know-how allows us to tailor the watertight solutions specified by the customer in the gas station fields.

Partners You Could Trust and Rely on

When you are looking for the solutions of underground watertight containment systems during building the new gas station and rebuilding the old gas station, **Compolite**® is the right partners you can talk to and rely on in the underground watertight containment fields. With our professional products of underground containments, more experiences in the gas station fields, the strong working teams of products research and developments, total quality managements and the technical full supports, we always provide the products, services and solution exceeding your expectation.

Respond Customers Quickly and Flexibly

Through our initiative and creative innovations, continuous improvements, hard working, quick and flexible response, we could meet the new higher requirements from our customers, help our customers to solve problems, and make our customers more competitive in global marketing.

Protect the Environments We Live

All the products, services and solutions provided by **Compolite**® strive to protect the environment we live in. Meanwhile, Compolite helps our customer work more easily and efficiently. Not allowing a drop of petrol permeating into soils and a drop of water into our sumps is our commitments.
